You can use Photoshop with or without a mouse. A mouse can be quite useful. The best way to learn how to use a mouse is to actually use one. Yes, you can be a great Photoshop artist without using a mouse. We will show you how later in the book. With a little practice, you can learn how to use Photoshop, without having to buy the software. The following are examples of some common, basic uses of Photoshop's tools and options that can be performed on a single layer. No layers are used in these examples. The Swatch palette: You can display a previously saved swatch color in the Swatch palette by selecting the Swatch palette with the shortcut keyboard keystroke combination of Ctrl+Y (on a Macintosh) or Shift+Y (on Windows). (The Swatch palette may also be assigned a shortcut key that you define, such as Ctrl+I.) The Swatch palette is a handy tool that can be used with both currently open images and images that have been saved. The Layer dialog box: You can access the Layer dialog box by choosing Window⇒Layers. The Layer dialog box enables you to view or create layers (not shown in Figure 2-6) and manipulate layer-level information, such as the color, blend mode, and opacity. You can create a new layer for any of the available layers by clicking in the active layer thumbnail and then clicking on the New Layer button at the top of the Layers palette. (This button is also shown in the figure.) The dialog box menu: The menu bar of the Photoshop dialog box (see Figure 2-6) allows you to access various dialog boxes. The menu commands are Options: Opens the Options dialog box. You can adjust the color and effects of existing layers, manage the resolution of the image (you may be asked to print or display the image at a different resolution), export the image to a new file format, and much more. Image: Opens the Image window with the most recently opened image. File: Opens the File browser. New: Opens the New dialog box. History: Opens the History dialog box. Undo: Undoes the last change to the current layer. You can also undo multiple changes by holding down the Shift key while you press the Ctrl key to make the red Undo button appear in the Layers palette and red arrows appear on the image.

It's easy to work with, because you don't need to activate a specific tool to choose that tool. You can access the Toolbox by going to the Tools panel (press Ctrl+U). Refer to Figure 1.2 on the next page. When you're working in the Toolbox, a small plus sign appears at the right end of the Toolbox panel (lower-right side of Figure 1.3). That means the tool is selected and ready to be used. If you click it again, it becomes deselected. **Figure 1.2** : The Tools panel **Figure 1.3** : The Tools panel with the Brush tool selected The Toolbox is divided into four parts: the Primary panel, the History panel, the Tools panel, and the Options panel. The Primary panel is empty, but you can add brushes to it.

Q: How to find the name of the specific value in the input? How to find the name of the specific value in the input? How to check the name of the specific value from the input in the same code? A: You can use a regex in conjunction with the \$1 variable which you refer to a captured group of the regular expression. `var str = ""; var match = str.match(/); if (match) { alert(match[1]); }` Or you can replace the name attribute with a class so you can select it with `jQuery('.yourclass')` You can test it here and here Sunday, October 5, 2014 Teaser and Day 5 - Things I Will Change in My Life Day 5 - Things I Will Change in My Life 1. Love 2. Money 3. Media 4. Love Money Media 5. My Childhood 1. Love I have always loved so I'm going to change this. I want to give back. Not giving money to make money but giving it away to people who need it. I can't really change the money but I can start giving it away. 2. Money I would go to a different school. I would also do that instead of doing my MBA. I love the school I go to now but I wouldn't be able to afford it. I would use my savings and go to a school I could afford. 3. Media I would go and tell people that media has influence but it doesn't. I would go around and tell people that people don't really change how they live because of TV. I would also say that people don't really make decisions because of movies and TV. 4. Love Money Media I would advertise that there is no such thing as wealth. I would tell people that we all make money and we all use money to live. If I was rich, I wouldn't share my
